HIMANSHU JOSHI

Full Stack Developer

Phone: +91 8950188696 | **Email:** hjoshi365.hj@gmail.com
Portfolio: https://himanshujoshi.vercel.app | **LinkedIn:** www.linkedin.com/in/itshimanshujoshi
Location: Yamuna Nagar, Haryana, 135001

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4+ years of experience building scalable, high-performance web applications. Specialized in React.js, Redux Toolkit, TypeScript, and modern frontend architectures. Proven track record of reducing page load times by 30%+, improving application stability, and delivering production-ready solutions. Strong expertise in REST API/GraphQL integration, JWT authentication, and full-stack development using Node.js, Laravel, and PHP frameworks.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Vue.js 3, Nuxt.js, TypeScript, JavaScript (ES6+), Redux Toolkit, RTK Query, React Query, Vuex, Pinia, HTML5, CSS3, Tailwind CSS, SASS, Bootstrap, jQuery

Backend: Node.js, Laravel, CodeIgniter 4, CakePHP, PHP, RESTful APIs, GraphQL

Databases: MySQL, MongoDB

Cloud & DevOps: AWS S3, AWS SES, AWS Bedrock, CI/CD Pipelines

Authentication & Security: JWT, OAuth 2.0, Role-Based Access Control (RBAC)

Tools & Workflow: Git, Bitbucket, NPM, Webpack, Vite, Jira, Postman, Jest, Vitest

Additional: State Management, Performance Optimization, Code Refactoring, WordPress Plugins, Agile/Scrum

---

PROFESSIONAL EXPERIENCE

Software Developer | LOGIC PROVIDERS DIGITAL PVT. LTD

June 2021 – Present

- Architected and developed production-grade web applications using React.js, Redux Toolkit, TypeScript, and RTK Query for enterprise clients including ARCC and Seoul Spice
- Reduced page load time by 30%+ through implementation of code-splitting, lazy loading, dynamic imports, and optimized component re-renders

- Designed and implemented scalable state management architecture using Redux Toolkit and RTK Query, improving application stability and data consistency by 40%

- Refactored legacy codebases from class components to modern React Hooks and functional components, improving code maintainability and reducing technical debt

- Implemented role-based access control (RBAC) and secure JWT authentication workflows, reducing unauthorized access incidents by 30%

- Built reusable UI component library with TypeScript interfaces, increasing development velocity and reducing code duplication across projects

- Integrated RESTful APIs and GraphQL endpoints with proper error handling, loading states, and optimized caching strategies

- Improved SEO performance through server-side rendering (SSR), meta tag optimization, and React best practices

- Developed internal real-time business dashboards that increased monitoring efficiency by 40%

- Automated product and price update workflows, decreasing manual effort and errors by 60%

- Collaborated in Agile/Scrum environment, participating in sprint planning, code reviews, and cross-functional team coordination

- Optimized MySQL database queries and implemented indexing strategies, reducing query execution time by 25%

KEY PROJECTS

LoyaltyLive – Admin Panel

Tech Stack: React.js, Redux Toolkit, RTK Query, TypeScript, Tailwind CSS, JWT, OAuth 2.0

- Developed scalable admin panel for mobile app content management and user configuration

- Implemented form validation using React Hook Form with custom validation schemas

- Built state management layer with Redux Toolkit and server-state synchronization using RTK Query

- Designed responsive layouts with Tailwind CSS supporting mobile, tablet, and desktop viewports

- Integrated JWT and OAuth 2.0 authentication flows with token refresh mechanisms

- Optimized rendering performance using React.memo, useMemo, and useCallback hooks

ARCC – Messaging Web Application

Tech Stack: React.js, Redux, React Router, REST API, Tailwind CSS

- Built feature-rich messaging platform with admin panel for user management and content moderation

- Implemented client-side routing with React Router including protected routes and lazy loading

- Designed centralized state management with Redux for global app state and user sessions

- Integrated REST APIs with Axios interceptors for error handling and retry logic

- Created responsive, accessible UI components following WCAG 2.1 guidelines

Seoul Spice – Restaurant Management System

Tech Stack: React.js, Redux, React Query, TypeScript, REST API

- Developed restaurant management interface for order tracking, menu control, and sales analytics

- Implemented server-state caching and automatic background refetching using React Query

- Built data visualization components for real-time analytics and reporting

- Optimized bundle size by 40% through code-splitting and tree-shaking

- Enhanced user experience with optimistic updates and intelligent prefetching strategies

Tasket – AI-Powered Task Management App (Personal Project)

Tech Stack: Next.js, React, Node.js, MongoDB, Tailwind CSS, AI APIs

- Built intelligent task management application with AI-powered prioritization algorithms

- Implemented server-side rendering with Next.js for improved SEO and performance

- Designed MongoDB schema with proper indexing for efficient time-based task queries

- Integrated third-party AI APIs for natural language processing and task categorization

---

EDUCATION

Bachelor of Technology in Computer Science Engineering
JMIT, Radaur, Haryana | 2017 – 2020

Diploma in Computer Engineering
Seth Jai Parkash Polytechnic, Haryana | 2014 – 2017

ADDITIONAL INFORMATION

Languages: English, Hindi, Punjabi
Date of Birth: August 9, 1999
